DETAILED ACTION

Allowable Subject Matter

1. An "Amendment" was received on December 9, 2004 in response to Office Action of August 9, 2004. Claims 18, 22, 25, and 30-32 have been canceled, new claims 34-39 have been added, claims 8-10, 16-17, 20-21, 23-24, 26-27, and 29 have been amended, and changes to the specification have been made, as indicated.
2. Claims 1-7, 19-21, 23, 24, 26-29, and 33-39 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to independent claims 1 and 9, prior art fails to disclose optical tweezers (optical trapping and transport of fine particles based on radiation pressure) using laser light comprising at least one Vertical Cavity Surface Emitting Laser (VCSEL), or a method of optically trapping and tweezing comprising optically spatially manipulating at least one object illuminated by laser light of a VCSEL.
5. With respect to independent claims 17, 21, and 24, prior art fails to disclose an optical tweezer or plurality of optical tweezers comprising a stage supporting an object or a plurality of optically manipulatable objects, a single or plurality of VCSELs which are independently intensity controllable, respectively originating a single or a plurality of laser light beams for concurrently optically manipulating single or plurality of objects supported upon the stage, thereby enhancing the optical force imparted to the object over that which would be imparted by a single laser beam.
6. With respect to independent claims 27 and 29, prior art further fails to disclose

optical tweezers comprising: two electrodes, at least one of which is optically transparent, holding between them at least one object suitably manipulatable both by (i) an electric field between the two electrodes and, also, (ii) an impinging laser light beam; and a VCSEL with a Laguerre-Gaussian energy distribution, to produce a laser beam passing through the at least one electrode that is transparent to impinge upon the at least one object so as to optically manipulate this at least one object; wherein the at least one object is susceptible of manipulation by both electrical and optical forces.

Claims 2-8,10-16, 19-20, 23, 26, 28, and 33-39 are allowed by virtue of their dependencies on the independent claims 1, 9, 17, 21, 24, 27, and 29.

Conclusion

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
